

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 8-K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of
the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): N/A

SOUTHWEST AIRLINES CO.

(Exact name of registrant as specified in its charter)

TEXAS	1-7259	74-1563240
(State or other jurisdiction of incorporation)	(Commission file number)	(I.R.S. employee identification no.)

P.O. Box 36611	
Love Field, Dallas, Texas	75235
(ADDRESS OF PRINCIPAL EXECUTIVE OFFICES)	(ZIP CODE)

Registrant's telephone number, include area code: (214) 904-4000

N/A
(Former name or former address, if changed
since last report)

Item 5. Other Events.

The Registrant files herewith those exhibits listed in Item 7 below.

Item 7. Financial Statements and Exhibits.

The following exhibits, all of which are for the fiscal year ended
December 31, 1994, are furnished in accordance with Item 601 of
Regulation S-K.

Exhibits

12	Calculation of Ratio of Earnings to Fixed Charges
23	Consent of Independent Auditors
99.1	Consolidated Financial Statements and Notes to Consolidated Financial Statements
99.2	Report of Independent Auditors
99.3	Management's Discussion and Analysis of Results of Operations and Financial Condition
99.4	Financial Data Schedule
	SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934,
the Registrant has duly caused this report to be signed on its behalf by the
undersigned thereunto duly authorized.

SOUTHWEST AIRLINES CO.

February 27, 1995

SEE ACCOMPANYING NOTES.
SOUTHWEST AIRLINES CO.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 1994.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation The consolidated financial statements include the accounts of Southwest Airlines Co. (Southwest) and its wholly owned subsidiaries (the Company). All significant intercompany balances and transactions have been eliminated. Certain prior year amounts have been reclassified for comparison purposes.

Cash and cash equivalents Cash equivalents consist of investment grade commercial paper issued by major financial institutions that are highly liquid and have original maturity dates of three months or less. Cash and cash equivalents are carried at cost, which approximates market value.

Inventories Inventories of flight equipment expendable parts, materials, and supplies are carried at average cost. These items are charged to expense when issued for use.

Property and equipment Depreciation is provided by the straight-line method to residual values over periods ranging from 15 to 20 years for flight equipment (see Note 3) and 3 to 30 years for ground property and equipment. Property under capital leases and related obligations are recorded at an amount equal to the present value of future minimum lease payments computed on the basis of the lessee's incremental borrowing rate or, when known, the interest rate implicit in the lease. Amortization of property under capital leases is on a straight-line basis over the lease term and is included in depreciation expense.

Aircraft and engine maintenance The cost of engine overhauls and routine maintenance costs for aircraft and engine maintenance are charged to maintenance expense as incurred. Scheduled airframe overhaul costs are capitalized at amounts not to exceed the fair market value of the related aircraft and amortized over the estimated periods benefited, presently 8 years. Modifications that significantly enhance the operating performance or extend the useful lives of aircraft or engines are capitalized and amortized over the remaining life of the asset.

Revenue recognition Passenger revenue is recognized when the transportation is provided. Tickets sold but not yet used are included in "Air traffic liability."

Frequent flyer awards The Company accrues the estimated incremental cost of providing free travel awards earned under its Company Club Frequent Flyer program.

Advertising The Company expenses the production costs of advertising as incurred. Advertising expense for the years ended December 31, 1994, 1993 and 1992 was \$79,475,000, \$55,344,000, and \$42,068,000, respectively.

2. ACQUISITION

On December 31, 1993, Southwest exchanged 3,574,656 newly issued shares of its common stock for all of the outstanding stock of Morris Air Corporation (Morris), a low-fare commercial/charter air carrier based in Salt Lake City. The acquisition was accounted for as a pooling of interests and, accordingly, the Company's consolidated financial statements were restated to include the accounts and operations of Morris for all periods prior to the acquisition.

Prior to 1993, Morris was treated as an S-Corporation for federal and state income tax purposes under applicable provisions of the Internal Revenue Code and various state tax laws. Therefore, no provision for income taxes was made prior to 1993. Morris made regular cash distributions to its shareholders sufficient to meet their tax liabilities. Upon termination of S-Corporation status on December 31, 1992, the undistributed S-Corporation retained earnings were reclassified to capital in excess of par value. Additionally, Morris established \$3,032,000 of deferred income taxes for the cumulative differences in the timing of reporting certain items for financial statement and income tax purposes. These deferred taxes related primarily to depreciation. The establishment of deferred taxes was offset by a reduction of capital in excess

of par value.

Merger expenses of \$10,803,000 relating to the merger of Southwest and Morris have been included in 1993 operating expenses as required for financial reporting purposes; however, these expenses have been separately reported as "merger expenses" to reflect the impact of the nonrecurring expenses on operating results. Included in these one-time costs resulting from the merger were \$1,900,000 of various professional fees; \$4,703,000 for disposal of duplicate or incompatible property and equipment; and \$4,200,000 for Employee relocation and severance costs related to elimination of duplicate or incompatible operations. During 1994, the integration of Morris into Southwest was substantially completed, including the disposal of incompatible property and equipment and settlement of Employee relocation and severance costs.

3. ACCOUNTING CHANGES

Income Taxes Effective January 1, 1993, the Company adopted Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" (SFAS 109). As a result of adopting SFAS 109, the Company recorded deferred tax assets of \$6,977,000 and reduced deferred tax liabilities by \$9,048,000 at January 1, 1993, which resulted in an increase to the Company's 1993 net income of \$16,025,000 (\$.11 per share) for the cumulative effect of the accounting change.

Postretirement Benefits Effective January 1, 1993, the Company adopted Statement of Financial Accounting Standards No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions" (SFAS 106). The cumulative effect of this change in accounting method at January 1, 1993 reduced 1993 net income by \$766,000 (net of benefit from income taxes of \$469,000) or \$.01 per share. The effect of adopting SFAS 106 on 1993 income before cumulative effect of accounting changes was not material.

Scheduled Airframe Overhauls Prior to January 1, 1992, the Company expensed scheduled airframe overhaul costs as incurred. This practice was adopted at a time when costs were relatively constant from year to year and consistent with the growth of the fleet.

Given the significant growth of the Company's fleet and the Company's 1991 modification of its airframe overhaul maintenance program with the Federal Aviation Administration (FAA), Southwest changed its method of accounting for scheduled airframe overhauls costs from the direct expense method to that of capitalizing and amortizing the costs over the periods benefited. The Company believes this method is preferable because it results in charges to expense that are consistent with the growth in the fleet; improves financial reporting; and better matches revenues and expenses.

For the year ended December 31, 1992, the Company recognized approximately \$6,900,000 in amortization of airframe overhaul expense. Had the direct expense method been used to provide for scheduled airframe overhaul costs during the year ended December 31, 1992, income before cumulative effect of accounting change would have been reduced by approximately \$9,800,000 (net of provision for income taxes and profitsharing of approximately \$8,800,000), or approximately \$.07 per share.

This change in accounting principle had the effect of a one-time adjustment increasing net income for the year ended December 31, 1992 by approximately \$12,538,000 (net of provision for income taxes and profitsharing of approximately \$11,500,000).

Change in Accounting Estimate Effective January 1, 1992, the Company revised the estimated useful lives of its 737-200 aircraft from 15 years to 15-19 years. This change was the result of the Company's assessment of the remaining useful lives of its 737-200 aircraft following the recent promulgation of rules by the FAA for the phase out of Stage 2 aircraft by December 31, 1999. The effect of this change was to reduce depreciation expense approximately \$3,680,000, or \$.03 per share, for the year ended December 31, 1992.

4. COMMITMENTS

The Company's contractual purchase commitments consist primarily of scheduled aircraft acquisitions. Twenty-five 737-300 aircraft are scheduled for delivery in 1995, 18 in 1996, and ten in 1997. Four 737-700s are scheduled for delivery in 1997, 16 in 1998, 16 in 1999, 15 in 2000, and 12 in 2001. In addition, the Company has options to purchase up to eleven 737-300s in 1997 and up to sixty-three 737-700s during 1998-2004. The Company has the option, which must be exercised two years prior to the contractual delivery date, to substitute 737-400s or 737-500s for the 737-300s to be delivered during 1997 and 737-600S or 737-800S for the 737-700s delivered subsequent to 1999. Aggregate funding needed for these commitments was approximately \$3,042.7 million, subject to adjustments for inflation, due as follows: \$602.6 million in 1995, \$489.5 million in 1996, \$447.8 million in 1997, \$445.4 million in 1998, \$452.9 million in 1999, \$366.0 million in 2000, and \$238.5 million in 2001. In addition, the Company has an agreement in principle to lease two used 737-300 aircraft in 1995.

The Company uses jet fuel fixed price swap arrangements to hedge its exposure

to price fluctuations on approximately 5 percent of its annual fuel requirements. As of December 31, 1994, the Company had jet fuel swap agreements with broker-dealers to exchange monthly payments on notional quantities amounting to 2,100,000 gallons per month, over the ensuing three months. Under the swap agreements, the Company pays or receives the difference between the daily average jet fuel price and a fixed price of approximately \$.518 per gallon. Gains and losses on such transactions are recorded as adjustments to fuel expense and have been insignificant. Although the agreements expose the Company to credit loss in the event of nonperformance by the other parties to the agreements, the Company does not anticipate such nonperformance.

</TABLE>

On March 1, 1993, the Company redeemed the \$100 million in senior unsecured 9% Notes due March 1, 1996 issued in March 1986. The Notes were redeemed at par plus accrued interest.

On September 9, 1992, Southwest issued \$100 million of senior unsecured 7 7/8% Notes due September 1, 2007. Interest is payable semi-annually on March 1 and September 1. The Notes are not redeemable prior to maturity.

During 1991, the Company issued \$100 million of senior unsecured 9 1/4% Notes, \$100 million of senior unsecured 9.4% Notes, and \$100 million of senior unsecured 8 3/4% Notes due February 15, 1998, July 1, 2001, and October 15, 2003, respectively. Interest on the Notes is payable semi-annually. The Notes are not redeemable by the Company prior to maturity.

The fair values, based on quoted market prices, of these Notes at December 31, 1994, were as follows (in thousands):

<TABLE>

<S>	<C>
9 1/4% Notes due 1998	\$102,000
9.4% Notes due 2001	103,820
8 3/4% Notes due 2003	100,670
7 7/8% Notes due 2007	93,070

</TABLE>

In 1992, certain Convertible Subordinated Debentures issued by Southwest Airlines Eurofinance N.V. were redeemed. The principal amount of \$35,000,000

was converted into 1,370,902 shares (unadjusted for the 1993 and 1992 stock splits) of Southwest's common stock at the conversion price of \$25.53 per share. The conversion was primarily a noncash transaction and, therefore, was excluded from the Statement of Cash Flows.

In addition to the credit facilities described above, Southwest has an unsecured Bank Credit Agreement with a group of domestic banks that permits Southwest to borrow through December 14, 1996 on a revolving credit basis up to \$300 million. Interest rates on borrowings under the Credit Agreement can be, at the option of Southwest, the agent bank's prime rate, .30% over LIBOR, or .50% over domestic certificate of deposit rates. The commitment fee is 0.1875% per annum. There were no outstanding borrowings under this agreement at December 31, 1994, 1993, or 1992.

7. LEASES

Total rental expense for operating leases charged to operations in 1994, 1993, and 1992 was \$198,987,000, \$167,303,000, and \$125,835,000, respectively. The majority of the Company's terminal operations space, as well as 89 aircraft, were under operating leases. The amounts applicable to capital leases included in property and equipment were (in thousands):

<TABLE> <CAPTION>

Long-term portion	\$ 186,214	
	=====	
</TABLE>		

The aircraft leases can generally be renewed at rates, based on fair market value at the end of the lease term, for one to five years. Most aircraft leases have purchase options at or near the end of the lease term at fair market value, but generally not to exceed a stated percentage of the defined lessor's cost of the aircraft.

8. COMMON STOCK

At December 31, 1994, the Company had common stock reserved for issuance pursuant to Employee stock benefit plans (12,009,293 shares) and upon exercise of rights pursuant to the Common Stock Rights Agreement (Agreement), as amended (155,265,088 shares).

Pursuant to the Agreement, each outstanding share of the Company's common stock is accompanied by one common share purchase right (Right). Each Right entitles its holder to purchase one share of common stock at an exercise price of \$16.67 and is exercisable only in the event of a proposed takeover, as defined by the Agreement. The Company may redeem the Rights at \$.0111 per Right prior to the time that 20 percent of the common stock has been acquired by a person or group. If the Company is acquired or if certain self-dealing transactions occur, as defined in the Agreement, each Right will entitle its holder to

purchase for \$16.67 that number of the acquiring company's or the Company's common shares, as provided in the Agreement, having a market value of two times the exercise price of the Right. The Rights will expire no later than July 30, 1996.

On May 19, 1993, the Company's Board of Directors declared a three-for-two stock split, distributing 46,325,147 shares on July 15, 1993. On May 20, 1992, the Company's Board of Directors declared a two-for-one stock split, distributing 46,180,531 shares on July 15, 1992.

In February 1992, the Company sold 2,500,000 shares (unadjusted for the subsequent 1993 and 1992 stock splits) of its common stock (2,327,892 new shares and 172,108 shares from treasury) in a public offering. Net proceeds from the sale of approximately \$86,946,000 were added to the working capital of the Company for general corporate purposes, including the acquisition of aircraft and related equipment.

9. STOCK PLANS

In May 1991, the Company's stockholders approved the Incentive Stock Option Plan and the Non-Qualified Stock Option Plan. Under the Incentive Stock Option Plan, options to purchase a maximum of 9,000,000 shares of Southwest Common Stock may be granted to key Employees. Under the Non-Qualified Stock Option Plan, options to purchase up to 750,000 shares of Southwest Common Stock may be granted to key Employees and non-employee directors. Under each plan, the option price per share may not be less than the fair market value of a share on the date the option is granted and the maximum term of an option may not exceed 10 years.

Information regarding the stock option plans is summarized below:

	Incentive Plan	Non-Qualified Plan

</TABLE>

* Includes 108,113 pre-split shares and 36,115 post-split shares, of which 5,476 pre-split shares and 72 post-split shares were issued from treasury.

** Includes 12,740 pre-split shares and 75,700 post-split shares.

The exercise price of outstanding options ranged from \$6.02 to \$37.44 in 1994, \$6.02 to \$19.71 in 1993, and \$6.02 to \$12.06 in 1992.

In 1991, the Company's stockholders also approved the Employee Stock Purchase Plan that provides for the sale of common stock to Employees of the Company at a price equal to 90% of the market value at the end of each purchase period. Common stock purchases are paid for through periodic payroll deductions.

Participants under the plan received 290,054 shares in 1994, 182,459 shares (59,442 pre-split shares and 93,296 post-split shares) in 1993 and 166,436 shares in 1992 at average prices of \$24.98, \$25.25, and \$12.89, respectively.

At December 31, 1994, 1993, and 1992, 1,489,753, 1,504,752, and 1,512,252 options to purchase the Company's common stock were also outstanding related to employment contracts with the Company's president and chief executive officer. Exercise prices range from \$1.00 to \$11.33 per share. Options for 15,000 shares, 7,500 shares (5,000 pre-split shares, of which 968 shares were issued from treasury), and 22,500 shares were exercised in 1994, 1993, and 1992, respectively.

Effective January 12, 1995, the Company adopted, pursuant to a collective bargaining agreement between the Company and the Southwest Airlines Pilots' Association (SWAPA), the 1995 SWAPA Non-Qualified Stock Option Plan (SWAPA Plan). Under the terms of the SWAPA Plan, 18,000,000 common shares have been reserved for issuance. An initial grant of approximately 14.5 million shares was made on the effective date at an option price of \$20.00 per share. On September 1 of each year of the agreement, commencing September 1, 1996, additional options will be granted to pilots that became eligible during that year at an option price equal to the fair market value of the common stock of the Company on the date of grant plus 5 percent. Options vest in ten annual increments of 10 percent and must be exercised prior to January 31, 2007, or within a specified time upon retirement or termination. In the event that SWAPA exercises its option to make the collective bargaining agreement amendable on or before September 1, 1999, any unexercised options will be canceled on December 1, 1999.

10. EMPLOYEE PROFITSHARING AND SAVINGS PLANS

Substantially all of Southwest's Employees are members of the Southwest Airlines Co. Profitsharing Plan (the Plan). Total profitsharing expense charged to operations in 1994, 1993, and 1992 was \$52,782,000, \$44,959,000, and \$26,363,000, respectively. The Company also elected to contribute \$3,605,000 in 1992 as a result of an accounting change (see Note 3).

The Company sponsors Employee savings plans under Section 401(k) of the Internal Revenue Code. The plans cover substantially all full-time Employees. The amount of matching contributions varies by Employee group. Company contributions generally vest over five years with credit for prior years' service granted. Company matching contributions expensed in 1994, 1993, and 1992 were \$19,817,000, \$13,986,000, and \$11,611,000, respectively.

11. INCOME TAXES

Effective January 1, 1993, the Company changed its method of accounting for income taxes from the deferred method to the liability method as required by SFAS 109 (see Note 3).

Under SFAS 109, deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The components of deferred tax assets and liabilities at December 31, 1994 and 1993, are as follows (in thousands):

<TABLE>
<CAPTION>

	1994	1993
	-----	-----
<S>	<C>	<C>
Deferred tax liabilities:

Total deferred tax assets	200,476	193,300
	-----	-----
Net deferred tax liability	\$223,028	173,141
	=====	=====

</TABLE>

In August 1993, the Revenue Reconciliation Act of 1993 (the "1993 Act") was enacted, which contains numerous provision changes including an increase in the federal corporate income tax rate from 34 percent to 35 percent effective January 1, 1993. As a result, the Company recognized approximately \$4.0 million

of additional expense related to deferred tax liabilities existing on January 1, 1993.

The provision for income taxes before the cumulative effect of accounting changes is comprised of the following (in thousands):

<TABLE>

<CAPTION>

	Liability Method		Deferred Method
	1994	1993	1992
<S>	<C>	<C>	<C>
Current:

Other, net	3,117

	\$ 21,260
	=====

</TABLE>

In January 1994, Southwest received an examination report from the Internal Revenue Service proposing certain adjustments to Southwest's income tax returns for 1987 and 1988. The adjustments relate to certain types of aircraft financings consummated by Southwest, as well as other members of the aviation industry during that time period. Southwest intends to vigorously protest the adjustments proposed with which it does not agree. The industry's difference with the IRS involves complex issues of law and fact that are likely to take a substantial period of time to resolve. Management believes that final resolution of such protest will not have a materially adverse effect upon the results of operations of Southwest.

The effective tax rate on income before cumulative effect of accounting changes differed from the federal income tax statutory rate for the following reasons:

<TABLE>

<CAPTION>

	Liability Method		Deferred Method
	1994	1993	1992
<S>	<C>	<C>	<C>
Tax at statutory U.S. tax rates	\$104,833	\$90,873	\$53,531

	-----	-----	-----
Total income tax provision	\$120,192	\$105,353	\$ 55,816
	=====	=====	=====

</TABLE>

12. NET INCOME PER COMMON AND COMMON EQUIVALENT SHARE

Net income per common and common equivalent share is computed based on the weighted average number of common and common equivalent shares outstanding (147,305,374 in 1994, 147,144,568 in 1993, and 142,945,890 in 1992). Fully diluted earnings per share have not been presented as the fully dilutive effect of shares issuable upon the exercise of options under the Company's Stock Option Plans, or conversion of Convertible Subordinated Debentures is anti-dilutive or is not material.

REPORT OF ERNST & YOUNG LLP
INDEPENDENT AUDITORS
The Board of Directors and Shareholders
Southwest Airlines Co.

We have audited the accompanying consolidated balance sheets of Southwest Airlines Co. as of December 31, 1994 and 1993, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 1994. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Southwest Airlines Co. at December 31, 1994 and 1993, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 1994, in conformity with generally accepted accounting principles.

As discussed in Note 3, during 1993, the Company changed its method of accounting for income taxes and postretirement benefits. Also as discussed in Note 3, during 1992, the Company changed its method of accounting for scheduled airframe overhauls.

ERNST & YOUNG LLP

Dallas, Texas
January 26, 1995

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

INDUSTRY CONDITIONS

The 1990s have been devastating financially for the passenger domestic airline industry, with Southwest as the sole exception among larger carriers. Since 1990, the industry has been shrinking and we have been expanding. We are now carrying more than twice the number of passengers annually than in 1990, an annualized growth rate of 21 percent. In 1993, with the advent of Continental Lite and plans laid for the United Shuttle, the competitive trend away from Southwest began to reverse. In 1994, in the face of our own aggressive expansion, we experienced a massive increase of new competitive service from United, Continental, Reno, and TWA. We also were negatively impacted by the industry's use of persistent fare sales during the fourth quarter, which occurred at a time when we were aggressively converting Morris Air Corporation (Morris) to Southwest's operations and were experiencing operating difficulties of our own in reservations and revenue management. The result was a 47 percent decline in earnings in fourth quarter 1994 as compared to fourth quarter 1993. Many of the operational issues that surfaced during fourth quarter 1994 have been, or will soon be, addressed, most notably reservations capacity. However, some of their effects will carry over into the first two quarters of 1995, and, further, we cannot predict the actions of our competitors.

In response to these increasing competitive pressures, we implemented several measures. However, we face significantly more competition than we did a year ago, which may also continue to adversely affect comparisons to 1994 quarterly performances, particularly in first half 1995.

As compared to year ago levels, load factors and passenger revenue yields are currently down. (The consolidated load factor for January 1995 was 57.8 percent, compared with 63.1 percent for the same month of a year ago.) Our expectation is that this trend will continue at least during first half 1995. As expected, the integration of Morris into Southwest during 1994, which included 21 aircraft and seven new cities, resulted in our immediate competitive presence in the northwestern region of the U.S. and Salt Lake City. However, these new markets, which are in the development stage and, therefore, understandably low-yielding, will need to improve for overall yields to compare favorably to year ago levels. While there is no way to predict precisely how fast these markets will develop, we are encouraged by the pace thus far. We have also been encouraged with Customer acceptance of recent price increases, which may improve yield comparisons. From an operating cost perspective, we have been pleased with recent favorable trends versus year ago levels, including fuel prices. Our goal is to continue this trend in 1995, despite our basic lack of control over fuel prices. Significant cost reduction opportunities lie in distribution costs. Ticketless travel, the new SABRE Basic Booking Request, our enhanced Ticket By Mail product, and expanded reservations operations should all combine to help reduce distribution costs. During 1995, we currently plan to add twenty-seven 737-300 aircraft to our fleet and one new city, Omaha, Nebraska, to our route system, which will allow us to focus on strengthening our existing route system.

RESULTS OF OPERATIONS

1994 COMPARED WITH 1993 The Company's consolidated net income for 1994 was \$179.3 million (\$1.22 per share), as compared to the corresponding 1993 amount (before the cumulative effect of accounting changes) of \$154.3 million (\$1.05 per share), an increase of 16.2 percent. The increase in earnings was primarily attributable to an increase in operating income of 8.5 percent and a decrease in other expenses (nonoperating) of 46.9 percent.

Operating Revenues Consolidated operating revenues increased by 12.9 percent in 1994 to \$2,591.9 million, compared to \$2,296.7 million for 1993. This increase in 1994 operating revenues was derived from a 12.7 percent increase in passenger revenues. Revenue passenger miles (RPMs) increased 14.8 percent in 1994, compared to a 16.8 percent increase in available seat miles (ASMs), resulting in a decrease in load factor from 68.4 percent in 1993 to 67.3 percent in 1994. The 1994 ASM growth resulted from the addition of 21 aircraft during 1994.

Freight revenues in 1994 were \$54.4 million, compared to \$42.9 million in 1993. The 26.9 percent increase in freight revenues exceeded the 16.8 percent increase in ASMs for the same period primarily due to increased air freight volumes and United States mail services.

Operating Expenses Consolidated operating expenses for 1994 were \$2,275.2 million, compared to \$2,004.7 million in 1993, an increase of 13.5 percent, compared to the 16.8 percent increase in ASMs. On a per-ASM basis, operating expenses (excluding 1993 merger expenses) decreased 2.3 percent in 1994. The primary factors contributing to this decrease were an 8.8 percent decrease in average jet fuel cost per gallon and lower agency commission costs, offset by

increased aircraft rentals.
Operating expenses per ASM for 1994 and 1993 (excluding 1993 merger expenses) were as follows:

<TABLE>
<CAPTION>

Operating expenses per ASM (expressed in cents)				
	1994	1993	Increase (decrease)	Percent change
<S>	<C>	<C>	<C>	<C>
Salaries, wages, and benefits	2.13	2.12	.01	0.5%
Profitsharing and Employee savings plans	.22	.21	.01	4.8
Fuel and oil	1.00	1.11	(.11)	(9.9)
Maintenance materials and repairs	.59	.59	--	--
Agency commissions	.47	.53	(.06)	(11.3)
Aircraft rentals	.42	.39	.03	7.7
Landing fees and other rentals	.46	.47	(.01)	(2.1)
Depreciation	.43	.44	(.01)	(2.3)
Other	1.36	1.39	(.03)	(2.2)
TOTAL	7.08	7.25	(.17)	(2.3)%

Salaries, wages, and benefits per ASM increased only .5 percent in 1994. This increase resulted from a 3.0 percent increase in average salary and benefits cost per Employee, partially offset by slower average headcount growth, which increased only 13.8 percent in 1994 versus the 1994 capacity (ASM) increase of 16.8 percent. The majority of the increase in average salary and benefits cost related to increased health benefits and workers' compensation costs. Employee productivity improved from 2,633 passengers handled per Employee in 1993 to 2,676 in 1994.

Profitsharing and Employee savings plan expenses per ASM increased 4.8 percent in 1994. The increase is primarily the result of increased matching contributions to Employee savings plans resulting from increased Employee participation and higher matching rates in 1994 for flight attendants and customer service employees under their respective collective bargaining agreements.

Fuel and oil expenses per ASM decreased 9.9 percent in 1994, primarily due to an 8.8 percent reduction in the average jet fuel cost per gallon from 1993. Jet fuel prices remained relatively stable throughout 1994, with quarterly averages ranging from \$0.51 to \$0.56 per gallon. Since year-end, fuel prices have averaged approximately \$0.54 per gallon.

In August 1993, the Revenue Reconciliation Act of 1993 was enacted, which, among other things, included an increase of 4.3 cents per gallon in transportation fuel tax, which becomes effective September 30, 1995, for jet fuel used in commercial aviation. This additional fuel tax will increase fuel expenses approximately \$7.5 million in fourth quarter 1995.

Maintenance materials and repairs per ASM was unchanged in 1994 compared to 1993.

Agency commissions per ASM decreased 11.3 percent due to a lower mix of travel agency sales and lower 1994 passenger revenue per ASM. The lower travel agency sales mix resulted from 1994 enhancements to Southwest's ticket delivery systems for direct Customers, as described below.

In response to actions taken by our competitor-owned reservations systems, we reduced our operating costs and enhanced our ticket delivery systems by developing our own Southwest Airlines Air Travel ("SWAT") system allowing high-volume travel agents direct access to reservations; introduced overnight ticket delivery for travel agents; reduced to three the number of advance days reservations required for overnight delivery of tickets to consumers (Ticket By Mail); developed our own Ticketless system, which was rolled out system-wide on January 31, 1995; and subscribed to a new level of service with SABRE that will automate the booking process for SABRE travel agencies effective May 1, 1995. We also continue to actively pursue other cost-effective solutions for automating non-SABRE travel agency bookings.

Aircraft rentals per ASM increased 7.7 percent in 1994. The increase primarily resulted from a third quarter 1994 sale/leaseback transaction involving ten new 737-300 aircraft and a lease of three used aircraft under long-term operating leases. At December 31, 1994, 44.7 percent of the Company's fleet was subject

to operating leases, compared to 43.3 percent at December 31, 1993.

Other operating expenses per ASM decreased 2.2 percent in 1994 compared to 1993. The overall decrease is primarily attributable to operating efficiencies resulting from the transition of Morris operational functions to Southwest, primarily contract services which decreased \$8.8 million (24.4 percent per ASM), offset by an increase in advertising costs of \$24.1 million (22.9 percent per ASM) and primarily associated with the start-up of seven new cities and new competitive pressures in 1994.

Other "Other expenses (income)" included interest expense, interest income, and nonoperating gains and losses. Interest expense decreased \$5.1 million in 1994 due to the March 1, 1993 redemption of \$100 million senior unsecured notes due 1996 and the repayment of approximately \$54.0 million of Morris long-term debt during first quarter 1994. Capitalized interest increased \$8.6 million in 1994 as a result of higher levels of advance payments on aircraft compared to 1993. Interest income for 1994 decreased \$1.9 million primarily due to lower cash balances available for short-term investment.

Income Taxes The provision for income taxes decreased in 1994 as a percentage of income before taxes, including the cumulative effect of accounting changes, to 40.1 percent from 40.6 percent in 1993. The 1993 rate was higher due to deferred tax adjustments in 1993 related to the 1993 increase in the federal corporate income tax rate from 34 percent to 35 percent (see Note 11 to the Consolidated Financial Statements). This was offset by increased 1994 effective state income tax rates.

1993 COMPARED WITH 1992 Prior to 1993, Morris operated as a charter carrier. In 1993, Morris began operating as a FAR 121 Certificated Air Carrier, or scheduled service carrier, consistent with Southwest. For comparability from 1993 to 1992, the statistical and operating data for 1992 are based on scheduled passenger service only (i.e., Southwest). Accordingly, RPMs and ASMs for 1992 relate only to scheduled carrier operations.

The Company's consolidated income for the year 1993 was \$154.3 million (\$1.05 per share), before the cumulative effect of accounting changes, compared to pro forma consolidated income of \$97.4 million (\$.68 per share) for 1992, an increase of 58.4 percent. The increase in earnings was primarily attributable to an increase in operating income of 50.7 percent and was achieved despite an increase in the federal income tax rate, which increased the provision for income taxes \$6.5 million, or \$.04 per share.

Operating Revenues Consolidated operating revenues increased by 27.4 percent in 1993 to \$2,296.7 million. Operating revenue per ASM for scheduled service carrier operations increased in 1993 to \$.0835 from \$.0789 in 1992. The increase in consolidated operating revenues was primarily related to a 36.5 percent increase in passenger revenues, which accounted for 96.5 percent of total operating revenues in 1993 versus 90.1 percent in 1992.

Consolidated RPMs increased 36.6 percent in 1993, which exceeded the 28.8 percent increase in ASMs, resulting in an increase in the load factor from 64.5 percent to 68.4 percent. The 1993 ASM increase resulted from the conversion of the Morris system from charter to scheduled service and the addition of 16 aircraft to the Southwest fleet. The additional 16 Southwest aircraft were primarily used to expand California, St. Louis, and Chicago markets and to initiate service from Louisville, Baltimore and San Jose.

Freight revenues increased in 1993 to \$42.9 million from \$33.1 million in 1992. The 29.6 percent increase in freight revenues exceeded the 28.8 percent ASM increase primarily due to further expansion of United States mail services and increased freight marketing programs.

Charter and other revenues decreased in 1993 from 1992 on a consolidated basis as Morris converted its operations in 1993 to scheduled service from charter operations. In 1993, consistent with the beginning of scheduled carrier service, Morris revenues were primarily derived from scheduled operations and, accordingly, classified as "passenger" revenues. Morris charter revenues totaled \$117.8 million in 1992.

Operating Expenses Consolidated operating expenses increased 24.6 percent to \$2,004.7 million from \$1,609.2 million in 1992. The primary factors contributing to the increase were the 28.8 percent increase in ASMs; increased contributions to profit-sharing and Employee savings plans; higher agency commissions; higher aircraft rentals; and increased maintenance costs.

On a consolidated basis, the Company incurred \$10.8 million of one-time merger expenses in connection with the December 1993 Morris acquisition. These expenses included \$1.9 million of various professional fees; \$4.7 million for disposal of duplicate or incompatible property and equipment; and \$4.2 million for Employee relocation and severance costs related to elimination of duplicate or incompatible operations. As required for financial reporting purposes, these expenses have been reported as operating expenses.

Salaries, wages, and benefits per ASM decreased 2.3 percent in 1993. Excluding the effects of Morris, Southwest's cost per ASM for salaries, wages, and

benefits increased .9 percent from 1992 to 1993. This increase resulted from a 2.2 percent increase in salaries and wages, offset by a 5.0 percent decrease in health benefit and workers' compensation costs per ASM. Headcount for Southwest increased 17.0 percent in 1993, slightly more than the 15.9 percent increase in ASMs. However, Employee productivity improved to 2,633 passengers handled per Employee in 1993 from 2,597 in 1992.

Morris contracted out all ground handling services, which are included in "other operating expenses." Consequently, salaries, wages, and benefits on a per-ASM basis are considerably lower for Morris than for Southwest contributing to the decrease in consolidated salaries, wages, and benefits per ASM. Profitsharing and Employee savings plan expenses per ASM increased 16.7 percent in 1993. The increase was primarily the result of higher earnings in 1993. For additional information, see Note 10 to the Consolidated Financial Statements.

Fuel and oil expenses per ASM decreased 2.6 percent in 1993 due to a 2.7 percent reduction in the average cost per gallon of jet fuel from 1992. Jet fuel prices remained relatively stable throughout 1993, continuing the trend which began in 1992, with quarterly averages ranging from \$0.57 to \$0.63 per gallon.

Maintenance materials and repairs per ASM increased 5.4 percent in 1993. This increase was primarily the result of higher airframe component repairs and higher amortization of capitalized scheduled airframe overhauls.

Agency commissions per ASM increased 6.0 percent in 1993 primarily due to increased passenger revenues per ASM.

Aircraft rentals per ASM increased 30.0 percent in 1993. The increase was primarily attributable to the expansion of Morris scheduled operations, which leased 18 of its 21 aircraft, 11 of which were leased in 1993. Additionally, the increase partially resulted from the sale/leaseback financing by Southwest, since late 1992, of seven 737-300 aircraft with long-term operating leases. Also in 1993, Southwest leased one used 737-300 aircraft under a long-term operating lease and one used 737-200 aircraft under a short-term operating lease.

Depreciation expense per ASM decreased 8.5 percent in 1993 due to the expansion of Morris, which, as stated above, consisted primarily of a leased aircraft fleet.

Other operating expenses per ASM increased 13.8 percent from 1992 to 1993. This increase is primarily the result of higher usage of contract services at Morris. As previously discussed, Morris contracted for all ground handling service, along with various other services that are handled internally at Southwest.

Other "Other expenses(income)" included interest expense, interest income, and nonoperating gains and losses. Interest expense, net of capitalized interest, decreased 7.0 percent in 1993 due to the March 1, 1993 early redemption of \$100 million in senior unsecured 9% Notes due 1996. See Note 6 to the Consolidated Financial Statements for further information. Net nonoperating losses in 1993 resulted from the write-down of certain internal system development costs and the settlement of certain employment-related litigation for \$1.7 million.

Income Taxes The provision for income taxes increased in 1993, as a percentage of income before income taxes and cumulative effect of accounting changes, to 40.6 percent from pro forma 38.1 percent in 1992. The increase was primarily the result of the increase in the federal income tax rate. See Note 11 to the Consolidated Financial Statements for further information.

LIQUIDITY AND CAPITAL RESOURCES

Cash provided from operations was \$412.7 million in 1994, compared to \$392.7 million in 1993. During 1994, additional funds of \$315.0 million were generated from the sale and leaseback of ten new 737-300 aircraft subject to long-term operating leases (increasing total commitments for operating leases by \$619.0 million).

During 1994, capital expenditures of \$788.6 million were primarily for the purchase of 18 new 737-300 aircraft, one used 737-300 aircraft previously leased by Morris, and progress payments for future aircraft deliveries. At December 31, 1994, capital commitments of the Company consisted primarily of scheduled aircraft acquisitions.

As of January 1995, Southwest had one-hundred-sixteen 737s on firm order, including twenty-five to be delivered in 1995, with options to purchase another seventy-four. Aggregate funding required for firm commitments approximated \$3,042.7 million through the year 2001 of which \$602.6 million related to 1995. See Note 4 to the Consolidated Financial Statements for further information.

The Company recently completed the construction of a \$10.0 million reservation center in Little Rock, Arkansas, which began accepting calls on January 24, 1995, and announced that it will build an additional reservation center in Oklahoma City scheduled to open in second quarter 1995. Total estimated cost of

the new Oklahoma City reservation center is approximately \$10.0 million.

As of December 31, 1994 and since 1990, the Company had authority from its Board of Directors to purchase 3,750,000 shares of its common stock from time-to-time on the open market. No shares have been purchased since 1990.

The Company has various options available to meet its capital and operating commitments, including cash on hand at December 31, 1994 of \$174.5 million, internally generated funds, and a revolving credit line with a group of banks of up to \$300 million (none of which had been drawn at December 31, 1994). In addition, the Company will also consider various borrowing or leasing options to maximize earnings and supplement cash requirements.

The Company currently has outstanding shelf registrations for the issuance of \$100 million senior unsecured notes and \$98 million pass-through certificates relating to sale/leaseback transactions. The Company presently intends to utilize these sources of financing during 1995.

Cash provided from operations was \$392.7 million in 1993 as compared to \$282.1 million in 1992. During 1993, additional funds of \$90.0 million were generated from the sale and leaseback of three new 737-300 aircraft subject to long-term operating leases (increasing total commitments for operating leases by \$145.0 million). Morris also generated \$17.8 million from certain bank borrowings. These proceeds were primarily used to finance aircraft-related capital expenditures and to provide working capital.
